

Getting a Passing Grade in a Difficult Class

underline

Physics used to be one of the most complicated subjects I ~~faced~~ ^{came across} last semester. Getting a good grade was vital as it would effect my GPA.

Therefore, to get a passing grade in that course, I followed a few simple steps. First, I organized my duties and made lecture attendance my number one priority. My presence during classes has helped me comprehend the material easily as well as writing significant notes on the margins of my textbook. Secondly, I reviewed what ^{had} ~~has~~ been taught in class during breaks lest I fall behind in my

studies. Next, before the exam by a few weeks,

I made a schedule showing the amount of units

I had to revise and the number of questions

that needed solving distributed ^{on different} along the days.

Finally, I kept myself motivated in many ways.

For instance, I hung inspiring quotes on the wall,

like the one I admire most by Steve Jobs that

says "The ones who are crazy enough to think

they can change the world are the ones who do."

I also reward ^{ed} myself after the completion of the

required tasks I set up for myself by watching

the television or reading a good book. When the

day of the exam arrived, I was ready to

^{or to prove my readiness}
^{test} prove my knowledge. When the results came out,

I got an A- as an outcome ^{of} for my efforts.

Concluding sentence?

Excellent work!
